

PRAVEENKUMAR GANESAN

Software Test Engineer | SDET

Salem, Tamil Nadu, India | Open to Remote/Relocation(Chennai, Bangalore, Coimbatore) | +91 8248717704 | praveenkumar55eee@gmail.com

www.linkedin.com/in/praveenkumarsoftwaretestengineer | <https://praveen55.github.io/Portfolio>

SUMMARY

Software Test Engineer with 5+ years of experience designing and executing manual and automated test strategies across web, mobile, and API platforms. Skilled in building scalable Selenium and Playwright automation frameworks (POM), integrating tests into CI/CD pipelines via Azure DevOps, and validating performance, security, and reliability with JMeter and ZAP. Track record of cutting regression cycles from 3 days to 1 day, reducing manual test effort by up to 40%, and driving quality improvements in Agile/Scrum teams.

CORE SKILLS

Programming Languages: Python, Java, SQL (Automation Scripting, Database Testing & Validation)

Automation Frameworks: Selenium WebDriver, Playwright, Page Object Model (POM), PyTest, TestNG, PyCharm, Eclipse

API, Performance & Security Testing: Postman, REST API Testing, Apache JMeter (Load & Performance Testing), OWASP ZAP (Security & Vulnerability Testing)

Test Management & CI/CD: Azure DevOps, Azure Pipelines, JIRA, Git, GitHub, GitHub Actions, Agile/Scrum Methodologies

Mobile & Web Testing: Cross-Browser Testing, Android Testing, iOS Testing, Responsive/Compatibility Testing

AI & Developer Tools: GitHub Copilot (AI-Assisted Test Scripting), Claude, VS Code

Process & Compliance: CMMI Standards, Test Plan & Test Case Documentation, Defect Lifecycle, RCA, RTM

EXPERIENCE

Vee Technologies - Software Test Engineer

March 2021 - August 2026 | Salem, Tamilnadu, India

- **Spearheaded** test automation initiatives using Selenium and Playwright with a Page Object Model framework, cutting regression testing time from 3 days to 1 day and enabling faster, more frequent release cycles.
- **Architected** performance and API test suites using JMeter and Postman, validating system reliability and scalability under high-load, real-world conditions.
- **Streamlined** defect lifecycle management and test planning workflows via Azure DevOps and JIRA, reducing resolution turnaround time and strengthening QA-development collaboration.
- **Led** end-to-end mobile application testing across Android and iOS platforms, ensuring consistent functionality, performance, and user experience across devices.
- **Drove** Agile & Scrum practices - including sprint planning, daily stand-ups, and retrospectives - to support continuous delivery and cross-functional alignment.

PROJECTS

Transport Management System (Logistics & Supply Chain Domain)

- **Developed** and executed Playwright automation scripts with GitHub Copilot, improving regression coverage and reducing manual testing effort by 30%.
- **Performed** load, API, and security testing using JMeter, Postman, and OWASP ZAP to validate system performance, scalability, reliability, and vulnerability resilience; tracked and resolved defects via Azure DevOps.
- **Facilitated** daily client status syncs, communicating sprint progress, defect metrics, and risk mitigation strategies.

Online Assessment & Recruitment Platform (EdTech / HR-Tech Domain)

- **Automated** 150+ web application test cases using Selenium WebDriver and integrated automated test workflows via GitHub Actions / Azure Pipelines, cutting manual testing effort by 40%.
- **Validated** Android/iOS apps for cross-platform functionality, performance, and UX consistency.
- **Authored** and executed 200+ test cases mapped to user stories in Azure DevOps, managing defects through the entire lifecycle to ensure timely closure.

EDUCATION

Bachelor of Engineering (B.E.)

Muthayammal Engineering College, Namakkal | 2016 - 2020 | CGPA: 8.1/10

CERTIFICATIONS & AWARDS

- AI Workflow Automation Certification - MindLuster
- Step into Robotic Process Automation - GUVI
- Python Programming Course: Beginner to Advanced - GUVI
- The ACE Employee Award - Vee Technologies
