SOFTWARE TEST ENGINEER

Software Test Engineer with 5+ years of experience in automation and manual testing, delivering high-quality software across web, mobile, and API platforms. Adept at designing scalable test strategies, integrating automation into CI/CD pipelines, and collaborating in Agile & Scrum environments. Proven track record of improving software reliability, accelerating release cycles, and driving process improvements aligned with industry standards.

SKILLS

- **Programming Languages:** Python, Java (Automation Scripting), SQL (Database Testing & Validation)
- **Automation Frameworks & Tools:** Selenium WebDriver, Playwright, PyTest, TestNG
- **API & Performance Testing:** Postman, REST API Testing, Apache JMeter (Load & Performance Testing)
- **Test Management & CI/CD:** Azure DevOps, JIRA, Git, GitHub, Azure Pipelines, Agile/Scrum Methodologies
- **Mobile & Web Testing:** Cross-Browser Testing, Android UI Testing, iOS Testing
- **AI & Developer Tools:** GitHub Copilot (AI-Assisted Code Build & Scripting), VS Code
- **Process Compliance:** CMMI Standards & Process Documentation

PROFESSIONAL EXPERIENCE

VEE TECHNOLOGIES - Salem, India

March 2021 - Present

Software Engineer

Accomplishments:

- Spearheaded automation initiatives using Selenium and Playwright, reducing regression testing cycles and accelerating release timelines.
- Designed and executed robust performance and API test suites with JMeter and Postman, ensuring system reliability under varying loads.
- Streamlined defect tracking and test management through Azure DevOps and JIRA, improving collaboration between QA and development teams.
- Conducted end-to-end mobile application testing on Android and iOS platforms, ensuring cross-platform functionality and user experience consistency.
- Actively contributed to Agile & Scrum practices, enhancing team productivity through sprint planning, daily stand-ups, and retrospectives.

PROJECTS

VTM - Transport Management System

- Developed and executed Playwright automation scripts with GitHub Copilot, enhancing regression coverage and reducing manual testing effort.
- Performed load testing (JMeter) and API testing (Postman) to validate system performance, scalability, and reliability, while reporting defects via Azure DevOps for timely resolutions.
- Facilitated daily client status syncs, communicating sprint progress, defect metrics, and risk mitigation strategies.

Hiermee Web and Mobile Application Testing

- Automated web application testing using Selenium, improving regression efficiency and reducing manual effort.
- Conducted load testing with JMeter to validate assessment platform scalability under high user concurrency.
- Performed mobile application testing on Android and iOS, ensuring cross-platform functionality and seamless user experience.

CERTIFICATIONS

- Completed AI Workflow Automation certification from MindLuster.
- Completed Fundamentals of Java certification on Sololearn
- Completed Diploma in Computer Applications (DCA).
